

# WINGS

## Dart Wings

Dress up your darts with Harley-Davidson® flight wings. These flights are available in many designs in assorted shapes individually packaged in an attractive blistercard. (Std. pack of 10)

### Shield Shape

This H-D® shape flight is cut in the profile of the trademark Bar & Shield, enhancing the flight design making this truly a set of Harley-Davidson® wings.

**Heavy Metal Darts**

The Heavy metal darts are made of just that - heavy metal. Unlike other metals, tungsten is an extremely dense material providing a heavier dart in a smaller mass. Because of these characteristics, the darts are slimmer allowing for tighter groups and higher scores and are the preferred choice of the most avid players.

- Tungsten barrels
- Engraved barrels
