*Latinum® Tungsten from Unicorn.
For the smoothest release yet.*

Why Latinum?

It's all about choice. Feedback from Team Unicorn and aspiring players all over the World confirms that barrel selection is very personal. The dart you throw is the dart that feels right to you.

Unicorn 2008 offers the widest possible selection of barrel shapes, weights, lengths, grips and now, feel.

Natural Tungsten gives superb grip, Golden gives the ultimate grip without slip. Now Unicorn introduce a third option, Latinum® Tungsten for an incredibly smooth comfort feel and release. If you find a particular grip too aggressive, try it in Latinum to get your perfect balance of grip and feel.

"Why are darts sold by weight, not length?" asked one of our correspondents. And we thought, what a very good point!

Say "Hello" to Stretch, the dart range catering for players more interested in barrel length than weight. All stretch barrels offer the slimmest diameter, the specified weight is achieved by extending the barrel and using materials of different densities.

Unicorn's longest barrel was around 54 mm. Now, Unicorn 2008 offers increased lengths up to 67 mm (Steel Tip) or 74 mm (Soft Tip)

There's more to Stretch than meets the eye - whilst the grip is the same pattern, it becomes more aggressive towards the back of the barrel where our research reveals that more and more players are holding their darts.

All Steel Tip Stretch barrels feature a rotating point allowing thrown darts to move out of the way of incoming darts.

The precise specification of barrels used by Phil Taylor. Supplied as barrels only in a metallic Micro case, Phil Taylor's original Purist features additional grooves to the back of the barrels for extra grip.

From time to time Team Unicorn players experiment with different barrels and set-ups. We actively support their initiative as part of our Research and Development programme and are pleased to make available the very darts that Team Unicorn players have in their tool-kits.

All Phil Taylor Purist darts are nominal 18g. All up weight will depend upon player configuration of flight and shaft.

Guaranteed Weight darts include a certificate guaranteeing the factory weight of each pointed dart barrel +/- 0.1 gram

ECLIPSE® PRO

There are many dartboards available for the discerning player to choose. There is only one dartboard, the Eclipse Pro from Unicorn, that is chosen year after year by the PDC to be used exclusively in all televised tournaments around the World. The unprecedented professional tournament play that Unicorn Eclipse boards endure provides invaluable feedback to Unicorn's engineers to monitor and continually improve Eclipse construction and performance.

TV cameras are unforgiving and the superlative live performance of Eclipse boards is visible and known to millions of viewers around the World.

The Smart Segments used in all Eclipse family boards use Minimum Metal for Maximum Target, actively improving scoring averages and checkout ratios and minimising bounceouts.

At the 2002 PDC World Matchplay Championship, Phil Taylor - using Unicorn darts on a Unicorn Eclipse dartboard - scored the first live televised 9-dart finish and recorded the highest ever TV match average of 112.17.

At the highest level of the professional sport of darts, Unicorn Eclipse boards give you that vital edge to maximise scores in an ultra-low bounceout environment. Players and surveys around the World consistently rate the Unicorn Eclipse Pro as the finest board available from any manufacturer, bar none.

ECLIPSE® PRO TRAINER

The Unicorn Eclipse Pro Trainer board. As used by Team Unicorn Members, the Eclipse Pro Trainer features ultra-slim doubles and trebles some 40% narrower than the Eclipse Pro match board. Ultra slim targets step up a player's game in practise, requiring astonishing accuracy, consistency and control. Eclipse Pro Trainer also features a new Micro Bull for training torture.

eBristle®

Purists recognize that the most satisfying game of darts is played on a traditional bristle dartboard. With boards of Eclipse construction, bounce outs are minimized and players can work on maximising averages.

Electronic, self-scoring, dartboards have been available for many years using darts with a plastic point that lodge in holes in the playing surface. However, bounce outs tend to be a regular, accepted part of the game.

Unicorn introduce eBristle dartboards, the latest generation of electronic bristle boards

featuring the advantage of a bristle rich playing surface with the fun and convenience of auto scoring. Now, you no longer need alternate sets of steel and soft tip darts, with a Unicorn eBristle board, enjoy the look and feel of a bristle board and the consistency of using your regular darts of choice.
